**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 3 and 4, drawn to a dispenser having the special technical feature, that it is made of transparent plastic.

Group II, claim(s) 5, drawn to a dispenser having the special technical feature of “telescoping”

Group III, claim(s) 6, drawn to a dispenser having the special technical feature a “removable tab”.

Group IV, claim(s) 7, drawn to a dispenser end cap having the special technical feature a square profile.

Group V, claim(s) 8, drawn to a dispenser having the special technical feature an end cap that is a “snap over paper holder”.

Group VI, claim(s) 9 and 17, drawn to a dispenser having the special technical feature an end cap with a rib capable of engagement with a notch in the dispenser.

Group VII, claim(s) 10, drawn to a dispenser having the special technical feature a cutting track that is adhesively bonded.

Group VIII, claim(s) 12, drawn to a container having the special technical feature a shearing device having two sharp edges.

Group IX, claim(s) 13, drawn to a container having the special technical feature a cutter track engaged with the cutting track holder of the end caps..

Group X, claim(s) 15, drawn to a container having the special technical feature a cutter track including at least one barbed end and having end caps with notches therein.

Group XI, claim(s) 14, drawn to a dispenser having the special technical feature a cutting track made from styrene based elastomer coextruded on polystyrene.

Group XII, claim(s) 18 and 19, drawn to a container having the special technical feature end caps that are connected to each other.

Group XIII, claim(s) 21, drawn to a container having the special technical feature “a snap on paper holder”.

Claims 1, 2, 11, 20, and 22-24 do not have a special technical feature and will be examined along with the elected Group.

2. The inventions listed as Groups I-XIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features as seen above. Each pair of groups above requires a distinct special technical feature not seen in the other groups.

### ***Conclusion***

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
